

For every building surface inside and out, we've got it covered.

Box Park

Brewery Village, Beaufort St, Liverpool L8 5XJ

Information

Tor Coating system used:

Category

Cladding

Sector

Hospitality

Guarantee

15 years

Coverage area

800m²

Background

The build was showing signs of damage, and the current colour scheme was dated. Client required an update as part of a new refacing and launch plan.

1

Free Site Survey

Tor Coatings conducted a site survey to thoroughly test the existing substrate and ensure any recommended system was fully compatible. This project required extensive preparation to the existing surfaces to a standard that will optimise the finish.

2

Project Specification

When the job was first requested it was assumed the building was plastisol coated sheeting, however it was discovered during the site survey the sheets were Galbestos coated. This is an Asbestos type of coating developed to coat and prolong the life of metal sheeting. One of the unique advantages of Unicover S is it can bond to Galbestos and encapsulate the risk attached to asbestos coatings.

3

Installation

Sheets were lightly washed down to remove any loose material but not disturb the Galbestos. Any rust was made good by means of preparing back to ST3 and metal priming with RC145 Elastaseal Metal primer. Unicover S10 was then spray applied for the final coating.

Damaged sheets were made good and replaced by contractors, these were then correctly prepared by solvent wiping with TH99 in preparation for coating with Unicover S10

4

Continued Support

The project has been completed in time and issued its 10 year single point guarantee with the approved contractor.
